3346011	user report doesn't match the report summary
---------	--

## Bill of Materials

### Files Included

cps\_9.0.2A.exe

## Components

The following line will be added to version.txt after execution of this patch:

```
patch=cps_9.0.2_3346011
```

## Patch

The following configuration files are modified by this patch:

- appserv/web/WEB-INF/lib/breeze.jar
- appserv/common/version.txt

## Deployment steps

1. Stop the Connect Pro Services using Service Panel
2. Backup files mentioned in the "Bits Affected by Patch" section.
3. Install Patch for ConnectPro
  - a. Copy the patch file to the server
  - b. Double-click **cps\_9.0.2A.exe** to start
  - c. Confirm the location / root directory where Adobe Connect is installed. (e.g. C:\Breeze)
  - d. Click Next
4. Start the Connect Pro Services
5. Repeat above steps for each server in the cluster
6. Verify version.txt changes (use [http://domain\\_name/version.txt](http://domain_name/version.txt))

## Rollback Steps

NOTE: In order to rollback a backup of the files replaced by the patch must have been created.

1. Stop the Connect Services
2. Delete files mentioned in the "Bits Affected by Patch" section
3. Rollback files mentioned in the "Bits Affected by Patch" section from back up
4. Restart the Connect Services
